ALE DeskPhones: Enterprise Range

Enjoy Symphonic HD audio clarity as if everyone were in the same room

The superwideband audio renders perfect bass and treble for quality conversations. The cylindric sound bar delivers 3D audio for a group conversation in a meeting room or in a home office. The three microphones capture the sound while attenuating surrounding noise to protect the quality of your conversations.

Boost your communication experience with many accessories and a colourful, stylish design

Make your workday brighter and bolder with the sleek, compact design, including metal frame, adjustable metal stand, and coloured textile covered sound bar. Add alphabetic keyboard, key module, and cordless handset to manage calls better. Pair headsets, computer, and smartphone using USB and Bluetooth® and enjoy excellent audio quality for all your conversations.

Enjoy high-quality, sustainable communications

These models are designed to be durable: Fabric, mechanics, and electronics are of high-quality. Interchangeable elements can be purchased in four colours. The phones adapt their already low power consumption to the accessories connected and to your presence using their built-in induction loop.

Meet all communications expectations

Choose the model that best suits your communications style. Whether you prefer a 100% touch screen experience, a model with touch screen and dial-pad, a model with contextual keys or even a model without handset, your communications experience will be rewarding. Models are described in the following pages.

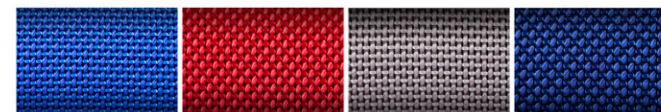

3D Symphonic HD audio quality

Premium fabric and metal materials

Easy-to-customise, connected object

Available in 4 colours. Change faceplates at any time.

ALE-500 DeskPhone without handset

Communicate with clarity

Your important communications are more interactive: Both speakerphone and handset offer superwideband technology. The cylindrical sound bar broadcasts voice in three dimensions enabling several people in a room to participate in the call.

Communicate everywhere

In open-plan offices, meeting rooms, or working at home using secure VPN connectivity and WLAN. Enjoy outstanding audio in all your virtual meetings using the speakerphone paired to your computer or smartphone.

Improve customer satisfaction

Successfully manage a large number of calls using the large display with context-sensitive keys, optional alphabetic keyboard and key expansion module.

Enterprise Series Accessories

ALE-100 - Alphabetical keyboard

The entire company directory is at your fingertips

No need to remember phone numbers, just search the corporate directory and connect instantly. Contacting people by name is intuitive using this Qwerty keyboard with large keys. It is magnetically fastened to the DeskPhone and connected by USB-C port to the back of the phone.

ALE-108 - WLAN/Bluetooth module

for wireless communications anytime

Communicate wherever you want: The phone is connected in WLAN 5 to your company network, or to your internet box. Pair with a Bluetooth headset to communicate without a cumbersome cord. Insert the module in a dedicated side panel.

ALE-110 - Wall mounting kit

Ensuring communications are always within reach

Easy to reach for visitors and staff: It can be mounted on a wall. The wall mounting kit is screwed onto the phone. Two screws are provided to ensure the unit is solidly in place even with frequent use.

ALE-120 - Key expansion module

Make it easy to connect customers with your employees

Monitor all your customer service lines at-a-glance with this module; 24-programmable keys with LEDs. The colour screens are very easy to read. Programming the keys is done electronically for easy maintenance. The module is connected and powered by the phone's USB-C port. *Check with ALE Business Partners for availability.*

Enterprise Series Accessories

ALE-140 - Customisation kits

Choose the colour that best suits your premises

Whether you want "Ruby" dynamic red, "Azure" bright blue, "Neptune" deep blue, or "Factory" industrial grey, the choice is yours. The handset, top panel, and sound bar coloured elements are easy to clip on. There is one kit per colour.

ALE-150 - Superwideband corded handset

For immersive conversations

When using the superwideband compatible handset, the people you speak with sound as if they are in the same room. The handset offers a streamlined design and an excellent grip and is connected using a dedicated RJ11 port on the back of the phone. It is sold with corded ALE DeskPhone models and as a spare part.

ALE-160 - Wireless wideband handset

Communicate with total freedom

The absence of a cord makes the handset more natural to hold. For more privacy, move to a huddle room up to 10 meters away from the phone, or stand during your phone calls: You will be energised! Change the volume, mute the microphone, and hang up remotely using the side buttons. The handset recharges automatically when idle on the phone. Requires the ALE-108 module. *Battery included.*

ALE-161 - Battery for ALE-160 cordless handset

For long wireless communications

This rechargeable battery provides power to the ALE-160 cordless handset. Its lithium-ion 3.7V 400mAh technology provides extended communications autonomy.
