# OmniSwitch Lightning Config
For fast and easy deployment

OmniSwitch® Lightning Config simplifies installation with fast, hassle-free, seamless and secure deployment – straight out of the box.

The power of OmniSwitch Lightning Config - as easy as 1-2-3!

1 Boot and login

2 Apply template

3 Go! (no reboot required)

Fast installation

- Laptop requires zero configuration
- Ethernet cable, web browser and basic networking knowledge all that's needed
- No app downloads or special adapters required

Hassle-free deployment

- Supports major browsers on iPhone, Android, Windows and Mac
- No need for static IP on remote devices
- Automation reduces errors caused by human intervention

Seamless, secure template creation

- Independently create and deploy templates – straight out of the box
- Export and apply templates to other switches

Benefits of OmniSwitch Lightning Config

✓ Efficient setup and deployment

✓ Enhanced security through local authentication and HTTPS access

✓ Flexibility to configure the switch according to specific needs

✓ Easy equipment deployment, with minimal expertise required

✓ Less chance of errors
